

CONSULTANCY FOR THE DIAGNOSIS, ADOPTION, SUSTAINABILITY AND CONTINUOUS IMPROVEMENT OF THE PROJECT PLANNING AND CONTROL SYSTEM

Sector: Oil and Gas

Client: Ecopetrol and business group

Year of completion: 2022

Description: consultancy for the diagnosis, adoption, sustainability and continuous improvement of the project planning and control system, through the following services:

- LEGO Serious Play Workshops
- Design Thinking Workshops
- Gamification workshops
- Agile Training
- Earned Training Valued Management

All services are provided by highly qualified professionals with certifications such as PMP, Lego Serious Play, Scrum, PMI-ACP and Design Thinking.

Achievements associated with the project:

With this project, the company Summum created a line in SPECIALIZED CONSULTANCY IN PROJECT MANAGEMENT, where customized solutions are available for problems related to Project Management, such as:

- Project Management Models/Methodologies (Waterfall, Agile, Hybrid)
- Advanced project management analysis (EVM, ESM, Forecast, Finance/Management Integration).
- Tutoring, facilitation and coaching in project management.
- Short-, medium- and long-term assistance solutions (KPO, technological automation, etc).

Mandate/Scope: Support the implementation and sustainability of the Earned Value methodology in the projects of the Vice Presidency of Engineering and Projects and accompany all the necessary activities that allow progress in achieving the objectives of improvement in project management at ECOPETROL and its Business Group.

Schedule:

Start Date: 2019 **End Date:** currently 2022

SUMMUM Project Manager: William Fernando Barrera
